Re: Update

In August 2007, Mississippi Valley Title shipped the new ALTA forms with instructions to our agents on how to download ValleyRite2007. We are preparing to send out a substantial update to the ValleyRite2007 software. This update was developed using the latest tools available from Microsoft. Microsoft discontinued support for Windows 98 in 2006, as a result, this ValleyRite2007 update is not compatible with these systems. If you are currently using Valleyrite2007 on a Windows 98 computer, the software will continue to function but it will not apply the update. Valleyrite2007 checks for updates every time the program executes and prompts you to download any updates that are available. You may choose to skip this update and continue working. We will release this update the week of September 8, 2008.

If you have a Windows version released prior to Windows XP, please complete the form below ASAP and fax (601-969-2215) to the Agency Dept. or e-mail agency@mvt.com.

Agency #: _____ Agency Name: _____

Type of Operating System: _____

New features of ValleyRite2007 include the following:

Paragraphs Changes

The commitment and policies headers have been changed to reflect our new address.
The agent address has been changed to reflect the complete address on the policies.

Policies

Users may issue a Pro Forma Policy.

Reporting

Users may reprint the Monthly Policy Report.
Users may print a TN Policy Report (if applicable).

If you have any problems with this update to ValleyRite2007, please call the Agency Department at 601-969-0222 or 1-800-647-2124. As always, we are happy to answer any questions you may have about ValleyRite2007 and appreciate your feedback.
